

PRODUCT WARNING:

“Green tea” on a product label does NOT mean green tea catechins are in the product.

Beneficial Green Tea catechins (anti-oxidants) are highly unstable. How do you know which products have the real green tea anti-oxidant activity?

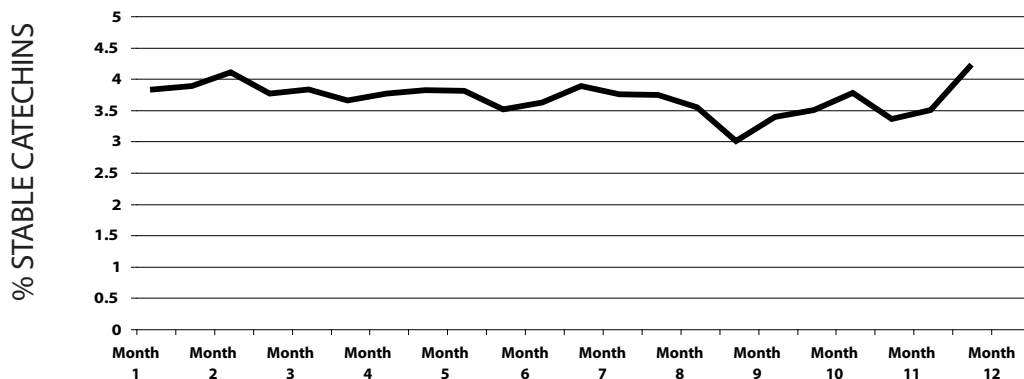

Polyphenon Green Tea Skin Cream has the most stable catechins and has the facts to prove it.

Polyphenon Green Tea Skin Cream was tested against 15 other leading brands that claim to include green tea. The results speak for themselves – 14 leading brands contained ZERO catechins, including Estee Lauder, Jason Tea Time and Green Beaver.

Polyphenon Green Tea Skin Cream contains 3.7% stable catechins.

POLYPHENON GREEN TEA SKIN CREAM	3.7%
